Subj IIS AND NOX- URGENT and IMPORTANT [REDACTED]
ect

Hi [REDACTED]

will you provide comments to all these items?

Can we somehow formulate an answer to the DPIWE question:

It is suggested in this report (and in Annex XV – NOx Issues) that the emission limit guidelines for NOx may not be complied with. If this is the case, **then a robust argument will need to be presented to the RPDC as to why it cannot be met**

EVERYBODY:

PLEASE NOTE ALSO THE FOLLOWING:

GUNNS HAS MADE AN ANNOUNCEMENT THAT THE IIS WILL BE SUBMITTED BY THE END OF THIS MONTH. This means that [REDACTED] reports have to be ready this week, so that [REDACTED] has time to make changes (We will have to check that they are using correct figures)

Regards

[REDACTED]
