Re: Site Selection

[REDACTED]

The main issue here is that neither John Gay or myself were consulted by you in relation to the selection process so I am not asking [REDACTED] to retrofit anything. Both of us and the board were the main parties that weighed up the information at hand. [REDACTED] have not sought information from DPIWE in relation to the Burnie marine environment. I am not proposing a retrofit here. I just want [REDACTED] to communicate properly with the people who made the decisions, have a bit of customer focus and understand what we are saying. You are heading down a path that will unnecessarily expose our company to criticism and this is not acceptable.
