

**Petition to the Tasmanian State Government to take action to immediately prohibit the aerial spraying of Herbicides/Pesticides/Fungicides over our water catchments.**

We the undersigned Citizens of Tasmania believe that aerial spraying of toxic chemicals is totally unacceptable. Problems with spray drift resulting from aurally applied chemicals cannot be overcome according to the APVMA who are the authority that regulates the usage of pesticides within Australia.

In order to protect the health and wellbeing of all Tasmanians, including future generations as well as the environment, we demand that aerial spraying cease immediately.
